PROJECT

AUTOMATED FIRE AVOIDANCE SYSTEM VIA SMS

- Created an innovative fire avoidance system utilizing Arduino Microcontroller, providing a reliable and cheap alternative to commercially available system.
- This groundbreaking project aims to enhance fire safety measures in both commercial and residential settings. By utilizing SMS alerts, the system promptly notifies relevant authorities and property owners, reducing response time and potential damage.
- Constantly detecting gas level in the environment with 98% accuracy and display the current level through the use of LCD display notifying the user without the need of a dedicated gas level indicator.
